

Notice 02/2024 – clause 6.7.2(d) of the PDRS Rule

Update to the process for WH1 water heaters acceptances in line with Activity Definition F16 of the ESS

8 July 2024

1. This Notice takes effect upon the commencement of the *Peak Demand Reduction Scheme (Amendment No. 1) Rule 2024* and is made under clause 6.7.2(d) of the PDRS Rule.
2. Subject to clause 3, Notice 03/2022 is revoked.

[In simplified terms, the effect of the revoked Notice was to globally accept all water heaters on the ESS 'Accepted Product List' under Activity Definition F16 of the ESS Rule as meeting the Equipment Requirements for Activity Definition WH1 of the PDRS Rule. The reason for revoking the Notice is that it is now unnecessary, because all of the relevant water heaters are individually accepted and are published under the Accepted Products list]

3. Clause 2 does not apply to any Implementation with an Implementation Date before the date of this Notice.

[The intent of clause 2 is to save any right of a certificate provider to make certificates in the future from an Implementation which relied on the revoked Notice as at the Implementation Date.]
